

Corona – we all need to prevent infection

To prevent infection RandersBolig has decided as follows:

- Communication between the local office and the caretakers will take place by phone or mail.
- The caretakers will only enter your home in case of urgent matters that cannot wait.

If a caretaker needs to enter your home, we ask that you respect the following:

- Avoid all physical contact such as handshakes etc.
- Keep a distance from the caretaker
- The caretakers will use disposable gloves

**RandersBolig urge you to comply
with the recommendations of the Danish Health Authority**

Novel coronavirus Protect yourself and others

The novel coronavirus typically spreads from one person to another in places with many people present via direct physical contact (shaking hands, hugging, kissing, etc.) and via droplets when an infected person coughs or sneezes. Take care of your health and protect others by doing the following:

Wash your hands frequently
or sanitize your hands with
an alcohol-based hand rub

Cough or sneeze into your
sleeve, not your hands

Limit physical contact
– avoid handshakes, refuse
kisses on the cheek and
avoid hugging

Be diligent with cleaning
– both at home and in
your workplace

If you are older or have
a chronic illness, avoid crowds
of people and advise others
to be aware of your condition
